RC008642

This publication presents selected 1970 U.S. Census data for incorporated Alaskan communities and unincorporated communities having a population of 25 persons or more. The data is derived from the 1970 census first-count microfilm.

The communities located in Alaska's 29 census divisions are grouped into six regional reports, as shown on the regional map. The table of contents in each report lists the communities included in each census division.

Note also that, although the U.S. Bureau of Census revised its population count for a few communities, detailed population and housing data was not corrected. The original first-count figures have been used throughout this publication.

The past populations of a number of communities are not listed. This is due to the lack of comparable historical data.

A useful reference work which can be used with this publication is the Alaska 1970 Census Atlas published by the Alaska Department of Labor, Employment Security Division. This atlas lists the population of every enumeration district in all of the State's 29 census divisions and shows the geographic location of the census divisions and of the enumeration districts as well.

A brief explanation of some terms may be helpful.

Race. The term "Alaska Native" includes Aleut, Eskimo, Indian, and others (Japanese, Filipino, and so on). The first-count data does not tally Alaska Natives separately so this figure was derived by subtracting the "White" and "Negro" subtotals from total population figures. Although this procedure overstates Alaskan Native population in a few communities with significant Japanese, Filipino, or other residents, it should be generally accurate for most Alaskan communities.

Median Age. This statistic was calculated only for groups of 25 or more persons.

Plumbing Facilities. The phrase "lacking one or more facilities" may include the lack of piped cold water, a toilet, some type of bathing facility, or hot water only. A comparison with the next heading, Toilet Facilities, might indicate whether the missing facility is hot water only or includes other utilities as well.

Value of Owner-Occupied Units. This statistic is based on the self-reported estimate of home owners. The total number of owners reporting housing values and the total number of owner-occupied homes are given at the end of this category to provide a quick comparison.
